Local CAD Guru

Local CAD Guru can help you with the following Engineering Services

Concept Design and Prototyping service

- Concept product design
- Sketching and 3D modeling
- Prototyping service
 - ▶ 3D printing of plastic material in many varieties like PLA, ABS, Nylon, TPU and more
 - ▶ CNC machined parts
 - ▶ Sheet metal stamped parts

Reverse Engineering & 3D Scanning

- Reverse engineer existing designs
- 3D scanning of existing parts and assemblies
- Improving existing designs.

Patent Review and Analysis

- Patent review, advice, and feedback reporting
- Report reverse engineering potential
- Provide reverse engineering solution to be taken to market
- Patent art and drawings

Entrepreneur A to Z Product Support Program

- Concept creation for your idea
- Patent writing service
- Design for manufacturing
- Manufacturing support
- Post production support

3D printing

- 3D printing specific product design for small production runs
- Large scale design and 3D printing of complex part and assemblies
- Design for injection molding with 3D printing proof of concept etc

CNC cutting programming

- DXF files for CNC cutting machines
- CNC programs for table cutters including water-jet, laser cutting, torch cutting
- Revamping and fixing existing files to ensure successful cutting

Outsourcing engineering service.

- Outsource your design
- Outsource your engineering and reverse engineering
- Outsource your R&D
- Outsource your drafting
